Book Condition: New. Publisher/Verlag: Springer, Wien | This volume is one in a series of monographs being issued under the general title of "Disorders of Human Communication". Each monograph deals in detail with a particular aspect of vocal communication and its disorders, and is written by internationally distinguished experts. Therefore, the series will provide an authoritative source of up-to-date scientific and clinical information relating to the whole field of normal and abnormal speech communication, and as such will succeed the earlier monumental work "Handbuch der Stimm und Sprachheilkunde" by R. Luchsinger and G. E. Arnold (last issued in 1970). This series will prove invaluable for clinicians, teachers and research workers in phoniatrics and logopaedics, phonetics and linguistics, speech pathology, otolaryngology, neurology and neurosurgery, psychology and psychiatry, paediatrics and audiology. Several of the monographs will also be useful to voice and singing teachers, and to their pupils. G. E. Arnold, Jackson, Miss. F. Winckel, Berlin B. D. General Clinical Considerations.- B. Brief, Clinical (Bedside) Examination for Dysphasia.- C. Clinical Guide to Classification of Dysphasic Syndromes.- D. Formal Language Evaluation.- 1. Five Aspects of Assessment in Dysphasia.- Dysphasia Testing as an Inventory of Language Input and Output Modalities.- Linguistic Aspects of Dysphasia Testing.- Diagnostic Aims of Dysphasia Testing.- The...
