RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 26 pages. OCLC Number: (OCoLC)56519092 Subject: Groundwater flow -- Seminole, Lake, Region (Ga. and Fla. ) -- Mathematical models. Excerpt: . . . Numerical Methods 9 per foot ( ft d ft ) in areas where undifferentiated overburden is Cauchy-Type Boundaries-3 present, and ( 3 ) was 8. 0x10 ft d ft for the bed of Lake Seminole ( Torak and others, 1996, table 4, pl. 5 ). In areas where Upstream of Lake Seminole, the Chattahoochee and Flint overburden is present, head in the overburden was estimated Rivers and Spring Creek are represented in the model by head-from water levels in wells. For the area representing Lake dependent Cauchy-type boundaries. Near Lake Seminole, Seminole, head was set equal to the pool elevation of Lake for the postimpoundment simulation, values of head at these Seminole during October 1986 ( 75. 66 ft ) for the postimpoundment boundaries were set to estimates of stage in these streams ment simulation and in the hypothetical preimpoundment during October 1986, which were influenced by the impoundment simulation; vertical hydraulic conductance was zero, representing the absence of overburden. streamflow...

## Reviews

*Completely essential read through publication. It normally does not expense excessive. It is extremely difficult to leave it before concluding, once you begin to read the book.*

-- **Morris Cruickshank**

*The ideal publication i at any time go through. It is actually rally fascinating throgh reading through time. I am pleased to inform you that this is actually the greatest book i have got read through during my individual existence and might be he best book for at any time.*
