Quantum Confined Semiconductor Nanostructures Volume 737 MRS Proceedings

By -

Materials Research Society. Hardcover. Book Condition: New. Hardcover. 834 pages. Dimensions: 0.0in. x 0.0in. x 0.0in. Progress in nanoscale engineering, as well as an improved understanding of the physical phenomena at the nanometer scale, have contributed to the rapid development of novel nanostructured semiconducting materials and nanodevices. Using new approaches, semiconductor structures can be fabricated with sub-nanometer accuracy and precisely controlled electronic and optical properties. The immense technological potential and new exciting physics have stimulated interest in semiconductor nanostructures over several years. This book brings together a single comprehensive overview of recent progress and future directions in nanoscale semiconductor research. Fields ranging from materials science to physics, chemistry, electrical and microelectronic engineering, circuit design, and more, are represented. Topics include: quantum dot theory, growth and optics; single quantum dot spectroscopy; charge and spin; SiGe quantum dot structures; bio-quantum dots; electric force microscopy and charge injection; transport; Si nanocrystals and nc-Si superlattices; SiGe nanostructures; bioactive nanostructures; lithographic techniques and lateral nanopatterning; semiconductor nanowires and nanotubes; metallic and rare-earth-doped nanoparticles; theoretical studies and numerical simulations in SiSiGe nanostructures and applications of Group IV nanoscale materials. This item ships from multiple locations. Your book may arrive from Roseburg OR, La Vergne TN, Hardcover,

Reviews

Excellent e-book and useful one. It is writter in straightforward phrases rather than confusing. I am just very happy to explain how here is the finest publication i have got read through in my very own lifestyle and might be he greatest book for possibly.

-- Viva Schuster

This created book is wonderful. It is amongst the most amazing book i have got go through. I am just effortlessly will get a enjoyment of looking at a created publication. -- **Prof. Jasper Murazik PhD**
